

# To Plan for Community Living, Learn Who Is in Your Nursing Homes: Insights from Preadmission Screening and Resident Review (PASRR) and the Minimum Data Set (MDS)

---

Ed Kako, PASRR Technical Assistance Center (PTAC)

Dan Timmel, Centers for Medicare and Medicaid Services

September 17, 2014

HCBS Conference, Arlington, VA

More Than Data.  
**Answers.**

# Two Arms of PTAC: TA & Research

- TA

- Direct TA to States (phone, email, site visits)
- Support to CMS (e.g., Regional Office calls)
- Monthly webinars
- Website with FAQs, articles, etc. – [www.PASRRassist.org](http://www.PASRRassist.org)

- Research

- Screening and Evaluation Tools (Level I and Level II)
- MDS
- Links between MDS and other administrative datasets

# Overview of Talk

- Brief review of PASRR
- History and purpose of MDS
- Relevant sections and items
- Methods for estimating prevalence of MI and ID/RC in nursing homes
- Key Findings:
  - PASRR identifies most individuals with ID/RC
  - PASRR misses many individuals with MI
- Questions and suggestions

# Brief Review Of PASRR

---

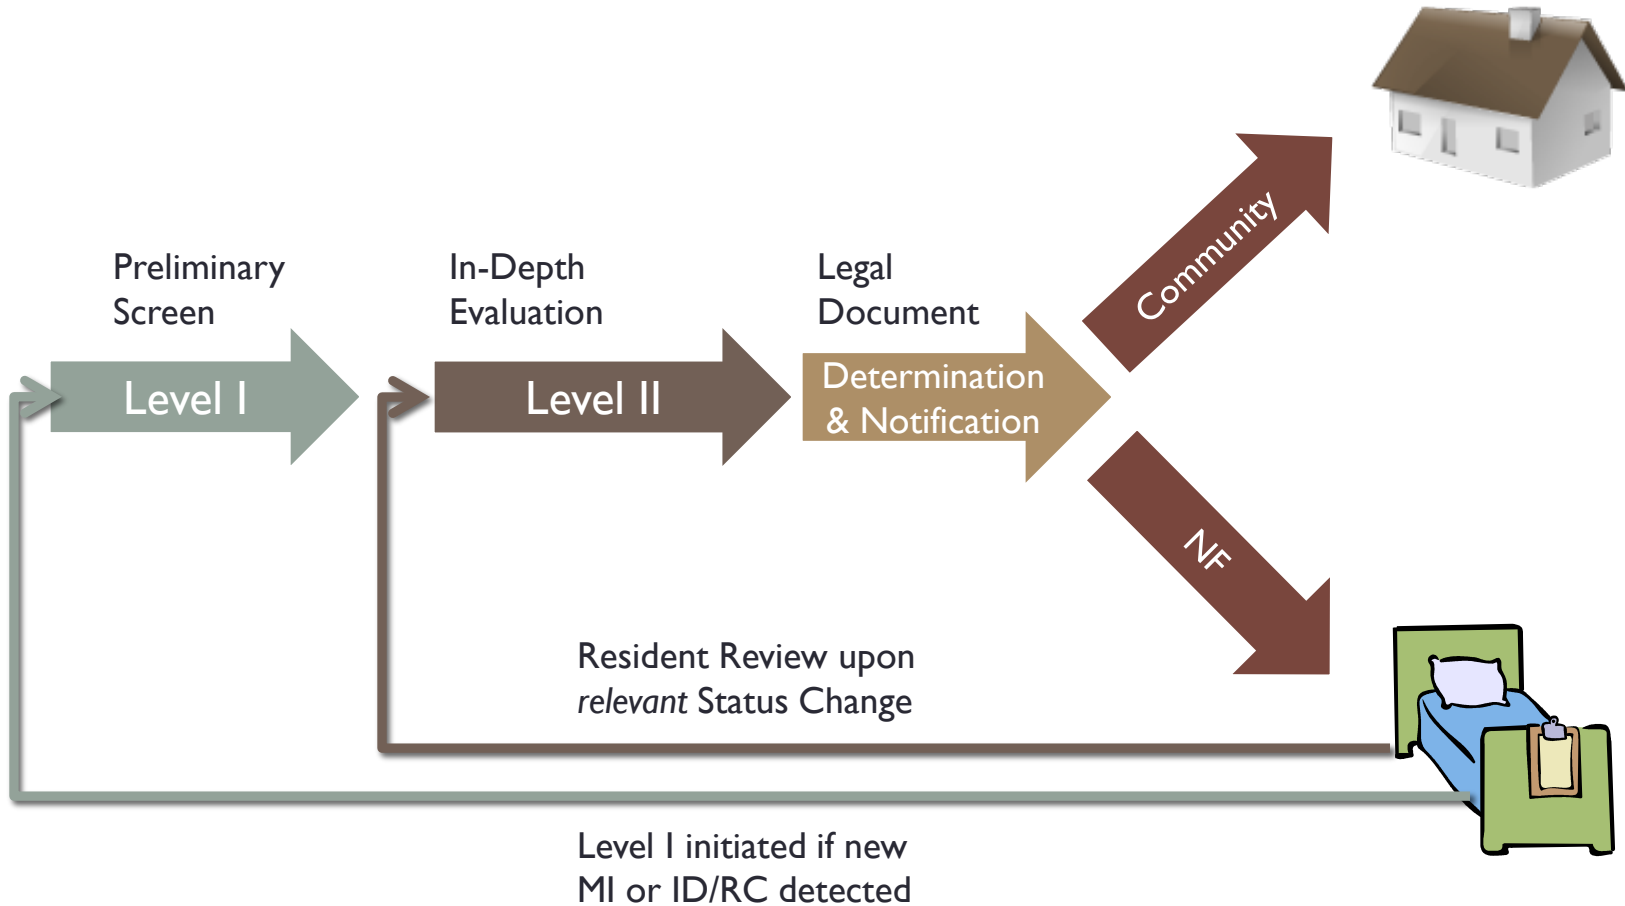

# Three Purposes of PASRR

1. To ensure that individuals are evaluated for evidence of possible mental illness (MI), intellectual disability (ID), or related condition (RC).
2. To see that community is considered as a placement option.
3. To recommend that they receive the services they need, wherever they are placed.

# Design and Implications of PASRR

- Required before admission to a Medicaid-certified nursing facility (NF), regardless of insurance.
- Level I = Rough screen for possible serious MI, ID, or RC.
- Level II = Comprehensive evaluation, and determination of need and appropriate placement.
- Administrative activity at enhanced 75% match.
- Tool for diversion, transition, rebalancing.
- Implications for HCBS, esp. §1915(c) waivers.

# The PASRR Process: A Basic Sketch

**PASRR Indicates  
Presence of MI/ID/RC**

**True Negatives**

**False Positives**

**PASRR Indicates  
Absence of MI/ID/RC**

**False Negatives**

**True Positives**

# NF is Not Housing

**Medicaid and state agencies must not approve admitting a person with MI or ID to a NF unless evaluated to require NF, and unless MI or ID needs will be met.**

NF is **not** housing. The state's choice:

- Either don't admit the person to NF; or
- Provide individualized, disability-specific services and supports as required to attain the highest practicable physical, mental, and psychosocial well-being.

# Review Of MDS

---

# History of MDS

- Before MDS, the only quality-of-care data on nursing homes were aggregate in nature.
- Advance of MDS was to make available a nationally standardized, person-level database.

## Key Dates

- 1987: MDS created as part of Nursing Home Reform Act
  - Social Security Act: 1819(f)(6)(A-B) for Medicare; 1919(f)(6)(A-B) for Medicaid
  - 42 CFR 483.20 and 42 CFR 483.315
- Early 1990s v1.0 tested in 10 states.
- January 1996: v2.0 goes live nationally.
- October 2010: v3.0 goes live nationally.

# Purposes of MDS

1. To assess nursing home quality and to help monitor the health and welfare of nursing facility (NF) residents.
2. To generate quality improvement measurements that nursing homes use internally and that state surveyors use in the survey and certification process.
3. To help states assess the cost effectiveness of care protocols.
4. To set long-term nursing home reimbursement rates.
5. To allow prospective residents and families to compare nursing home quality measures ([Nursing Home Compare](#)).

# Timing of MDS

- MDS assessment forms are completed for all residents in certified nursing homes, regardless of payment type.
- Timing:
  - Within 14 days of admission
  - At quarterly and yearly intervals; annual surveys more detailed
  - Upon significant change in condition

## MDS Data Flow

- Completed in NF by multiple staff, overseen by MDS coordinator.
- Uploaded to CMSNet, a national database.

# Topics & Sections of MDS

- A: Identification Information
- B: Hearing, Speech, and Vision
- C: Cognitive Patterns
- D: Mood
- E: Behavior
- G: Functional Status
- H: Bladder and Bowel
- I: Active Diagnoses
- J: Health Conditions
- K: Swallowing/Nutritional Status
- L: Oral/Dental Status
- M: Skin Conditions
- N: Medications
- O: Special Treatments, Procedures, and Programs
- P: Restraints
- Q: Participation in Assessment and Goal Setting
- S: Optional State Items
- X/Z: Correction/Admin

# Unique Properties of MDS

- Provides snapshot of nursing home residents at point of time.
- Includes characteristics of residents not available from other sources, including persistent conditions and medication types.
- Can be used to understand dynamics/flow of nursing home populations.

# First Two Pages of MDS

**MINIMUM DATA SET (MDS) - Version 3.0**  
**RESIDENT ASSESSMENT AND CARE SCREENING**  
*Nursing Home Quarterly (NQ) Item Set*

Section A Identification Information	
<b>A0050. Type of Record</b>	
Enter Code <input type="checkbox"/>	1. <b>Add new record</b> → Continue to A0100, Facility Provider Numbers 2. <b>Modify existing record</b> → Continue to A0100, Facility Provider Numbers 3. <b>Inactivate existing record</b> → Skip to X0150, Type of Provider
<b>A0100. Facility Provider Numbers</b>	
A. National Provider Identifier (NPI): <input type="text"/>	
B. CMS Certification Number (CCN): <input type="text"/>	
C. State Provider Number: <input type="text"/>	
<b>A0200. Type of Provider</b>	
Enter Code <input type="checkbox"/>	<b>Type of provider</b> 1. Nursing home (SNF/NF) 2. Swing Bed
<b>A0310. Type of Assessment</b>	
Enter Code <input type="checkbox"/>	<b>A. Federal OBRA Reason for Assessment</b> 01. Admission assessment (required by day 14) 02. Quarterly review assessment 03. Annual assessment 04. Significant change in status assessment 05. Significant correction to prior comprehensive assessment 06. Significant correction to prior quarterly assessment 99. None of the above
Enter Code <input type="checkbox"/>	<b>B. PPS Assessment</b> <b>PPS Scheduled Assessments for a Medicare Part A Stay</b> 01. 5-day scheduled assessment 02. 14-day scheduled assessment 03. 30-day scheduled assessment 04. 60-day scheduled assessment 05. 90-day scheduled assessment 06. Readmission/return assessment <b>PPS Unscheduled Assessments for a Medicare Part A Stay</b> 07. Unscheduled assessment used for PPS (OMRA, significant or clinical change, or significant correction assessment) Not PPS Assessment 99. None of the above
Enter Code <input type="checkbox"/>	<b>C. PPS Other Medicare Required Assessment - OMRA</b> 0. No 1. Start of therapy assessment 2. End of therapy assessment 3. Both Start and End of therapy assessment 4. Change of therapy assessment
Enter Code <input type="checkbox"/>	<b>D. Is this a Swing Bed clinical change assessment?</b> Complete only if A0200 = 2 0. No 1. Yes

A0310 continued on next page

Section A Identification Information	
<b>A0310. Type of Assessment - Continued</b>	
Enter Code <input type="checkbox"/>	<b>E. Is this assessment the first assessment (OBRA, Scheduled PPS, or Discharge) since the most recent admission/entry or reentry?</b> 0. No 1. Yes
Enter Code <input type="checkbox"/>	<b>F. Entry/discharge reporting</b> 01. Entry tracking record 10. Discharge assessment-return not anticipated 11. Discharge assessment-return anticipated 12. Death in facility tracking record 99. None of the above
Enter Code <input type="checkbox"/>	<b>G. Type of discharge</b> - Complete only if A0310F = 10 or 11 1. Planned 2. Unplanned
<b>A0410. Submission Requirement</b>	
Enter Code <input type="checkbox"/>	1. Neither federal nor state required submission 2. State but not federal required submission (FOR NURSING HOMES ONLY) 3. Federal required submission
<b>A0500. Legal Name of Resident</b>	
A. First name: <input type="text"/>	B. Middle initial: <input type="text"/>
C. Last name: <input type="text"/>	D. Suffix: <input type="text"/>
<b>A0600. Social Security and Medicare Numbers</b>	
A. Social Security Number: <input type="text"/>	
B. Medicare number (or comparable railroad insurance number): <input type="text"/>	
<b>A0700. Medicaid Number</b> - Enter "+" if pending, "N" if not a Medicaid recipient <input type="text"/>	
<b>A0800. Gender</b>	
Enter Code <input type="checkbox"/>	1. Male 2. Female
<b>A0900. Birth Date</b>	
<input type="text"/> - <input type="text"/> - <input type="text"/> Month Day Year	
<b>A1000. Race/Ethnicity</b>	
↓ Check all that apply	
<input type="checkbox"/>	A. American Indian or Alaska Native
<input type="checkbox"/>	B. Asian
<input type="checkbox"/>	C. Black or African American
<input type="checkbox"/>	D. Hispanic or Latino
<input type="checkbox"/>	E. Native Hawaiian or Other Pacific Islander
<input type="checkbox"/>	F. White

# Population in Nursing Homes

- At any given time, there are ~1.3 million individuals in nursing homes nationwide.
  - Medicare, Medicaid, and private pay
- Existing literature suggests ~250,000 individuals with mental illness (MI), intellectual disability (ID), or related condition (RC).

## PASRR Related Questions in MDS

- MDS 3.0 (October 2010) added A1500: Asks whether the individual has been identified by PASRR as having MI, ID, or RC.
- Subsequent update (April 2012) added A1510: Requires respondents to indicate the Dx of any individual for whom A1500 is "yes" (MI, ID, or RC).
- Use of A1500 was poor in 2010 and 2011 (many missing responses); improved dramatically in 2012.

# MDS PASRR Questions

<b>A1500. Preadmission Screening and Resident Review (PASRR)</b>	
Complete only if A0310A = 01, 03, 04, or 05	
Enter Code <input type="checkbox"/>	<p><b>Is the resident currently considered by the state level II PASRR process to have serious mental illness and/or intellectual disability ("mental retardation" in federal regulation) or a related condition?</b></p> <p>0. <b>No</b> → Skip to A1550, Conditions Related to ID/DD Status</p> <p>1. <b>Yes</b> → Continue to A1510, Level II Preadmission Screening and Resident Review (PASRR) Conditions</p> <p>9. <b>Not a Medicaid-certified unit</b> → Skip to A1550, Conditions Related to ID/DD Status</p>
<b>A1510. Level II Preadmission Screening and Resident Review (PASRR) Conditions</b>	
Complete only if A0310A = 01, 03, 04, or 05	
↓ <b>Check all that apply</b>	
<input type="checkbox"/>	<b>A. Serious mental illness</b>
<input type="checkbox"/>	<b>B. Intellectual Disability ("mental retardation" in federal regulation)</b>
<input type="checkbox"/>	<b>C. Other related conditions</b>

# Dataset for Current Analysis

- MDS 3.0: October 1, 2010-December 31, 2013
- Focused on 2012 and 2013 – first years with A1510.

# Ways Of Counting NF Residents

---

## “Census” Method

- Everyone in a Medicaid-certified NF as of December 31...
- Who has been observed at least once in past 150 days.

## “New Admission” Method

- All admissions records for a given year.
- For individuals who have no admissions records in prior years.

# Uses of These Methods

- Census method used by CMS and other contractors.
- New admissions method used in academic literature.

# Prevalence of Intellectual Disabilities (ID) and Related Conditions (RC)

---

# Section A: Identification Information

Section A		Identification Information	
<b>A1550. Conditions Related to ID/DD Status</b>			
If the resident is 22 years of age or older, complete only if A0310A = 01			
If the resident is 21 years of age or younger, complete only if A0310A = 01, 03, 04, or 05			
↓ <b>Check all conditions that are related to ID/DD status</b> that were manifested before age 22, and are likely to continue indefinitely			
		<b>ID/DD With Organic Condition</b>	
<input type="checkbox"/>		<b>A. Down syndrome</b>	
<input type="checkbox"/>		<b>B. Autism</b>	
<input type="checkbox"/>		<b>C. Epilepsy</b>	
<input type="checkbox"/>		<b>D. Other organic condition related to ID/DD</b>	
		<b>ID/DD Without Organic Condition</b>	
<input type="checkbox"/>		<b>E. ID/DD with no organic condition</b>	
		<b>No ID/DD</b>	
<input type="checkbox"/>		<b>Z. None of the above</b>	

# ICD Codes Included for ID/RC

- 317-319: intellectual disabilities
- 758: chromosomal abnormalities associated with ID/RC)
- V79: certain special screenings for I/DD

## Detection Rates of ID/RC by Different Dx Items: Census

Year	Count	A1510B/C (PASRR)	A1510B/C or At Least One A1550	A1510B/C or At Least One A1550 or At Least One I8000
2012	1,112,692	2.1%	2.3%	3.1%
2013	1,292,583	2.2%	2.4%	3.2%

PASRR identifies about 2/3 of individuals with ID/RC.

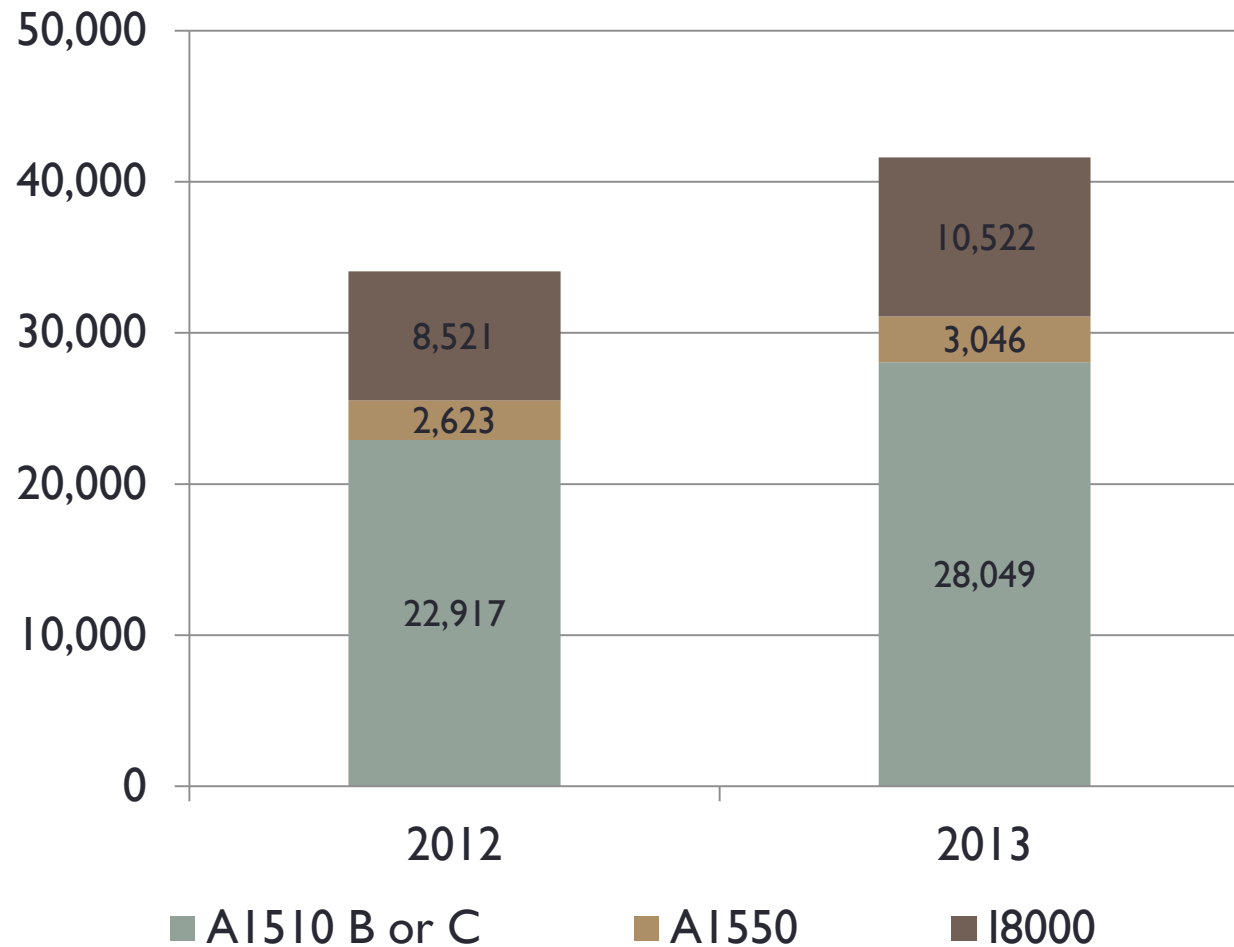

# ID/RC: Census

# ID/RC: Census

# ID/RC: Census

# How Does Dx of ID/RC Change with Age?

---

# Dx Indicating ID/RC (2013, Census)

**90 and older**

# Dx Indicating ID/RC (2013, Census)

**80-89 years**

# Dx Indicating ID/RC (2013, Census)

**70-79 years**

# Dx Indicating ID/RC (2013, Census)

**60-69 years**

# Dx Indicating ID/RC (2013, Census)

**50-59 years**

# Dx Indicating ID/RC (2013, Census)

**40-49 years**

# Dx Indicating ID/RC (2013, Census)

**30-39 years**

# Dx Indicating ID/RC (2013, Census)

**0-17 years**

# Prevalence of Mental Illness (MI)

---

# Section I: Other MI Dx

## Section I

## Active Diagnoses

### Active Diagnoses in the last 7 days - Check all that apply

Diagnoses listed in parentheses are provided as examples and should not be considered as all-inclusive lists

#### Psychiatric/Mood Disorder

- I5700. Anxiety Disorder**
- I5800. Depression** (other than bipolar)
- I5900. Manic Depression** (bipolar disease)
- I5950. Psychotic Disorder** (other than schizophrenia)
- I6000. Schizophrenia** (e.g., schizoaffective and schizophreniform disorders)
- I6100. Post Traumatic Stress Disorder (PTSD)**

# Two Categories of Mental Illness: Narrow and Broad

- **Narrow:**
  - Schizophrenia
  - Bipolar Disorder
  - Other psychotic disorder
- **Broad**
  - Types of MI in Narrow definition
  - *Plus* all other types in Section I and ICD codes:
    - 295-302
    - 306-314

## Detection Rates of Narrow MI by Different Dx Items

Year	Census	A1510A (PASRR)	A1510A Or At Least One I5700- 6100	A1510A Or At Least One I5700- 6100 Or At Least One I8000
2012	1,112,692	3.6%	11.0%	31.0%
2013	1,292,583	4.1%	11.9%	29.6%

PASRR identifies less than 20% of individuals with narrow MI.

## Detection Rates of Broad MI by Different Dx Items

Year	Census	A1510A (PASRR)	A1510A Or At Least One I5700- 6100	A1510A Or At Least One I5700- 6100 Or At Least One I8000
2012	1,112,692	3.6%	59.4%	69.4%
2013	1,292,583	4.1%	60.2%	69.0%

PASRR identifies about 5% of individuals with broad MI.

**50-59 years**

# Dx Indicating Broad MI (2013, Census)

**40-49 years**

# Dx Indicating Broad MI (2013, Census)

**30-39 years**

# Dx Indicating Broad MI (2013, Census)

**18-29 years**

# Dx Indicating Broad MI (2013, Census)

**0-17 years**

## Summary

- PASRR does a decent (if imperfect) job identifying individuals with ID/RC.
- PASRR does a poor job of identifying individuals with serious MI.
- Among individuals with Dx of MI, detection by PASRR is more likely among young adults and the middle-aged.

## Possible Explanations

1. Nursing home residents accurately record PASRR status, but PASRR programs fail to identify individuals with MI, because (e.g.) Level I screens are too restrictive.
2. Nursing home assessors are not accurately recording PASRR status.

*Not mutually exclusive.*

# Questions for Future Research: Examples

- How do outcomes for people with MI compare for when detected by PASRR vs. not detected by PASRR?
- Do claims data show any evidence of individuals receiving services we might classify as Specialized Services?
