The Challenges and Opportunities of New Medicare Advantage Supplemental Benefits

December 8, 2020

A Turning Point in Medicare Policy

Medicare Advantage supplemental benefits were historically limited to acute, post-acute, and medical ("health related") services

| | Year | Policy Change | Examples |
|--------------------|------|--|---|
| LTSS-like | 2019 | CMS expands definition of "primarily health related" to allow services typically viewed as custodial/ maintenance; also allowed uniform flexibility | Adult day, in-home supports, respite, safety home modifications |
| Social Services | 2020 | Congress allows for provision of services not primarily health related targeted to medically complex, chronically ill individuals (SSBCI), with a high risk of hospitalization or other adverse health outcomes and in need of intensive care coordination | Healthy food, socialization activities, housing supports |
